

AMENDMENTS TO THE CLAIMS:

This listing of claims will replace all prior versions and listings of claims in the application:

1. (Currently amended) A display device comprising:
a display unit which displays an image and can be remotely controlled by a remote controller;
a management table which stores display attribute information indicating predetermined information included in the image displayed by the display unit; and
a control unit which magnifies [[a]] the predetermined information included in the image displayed by the display unit, according to the attribute information and a distance between the remote controller and the control unit.
2. (Original) The display device according to claim 1, wherein the control unit comprises a distance measuring unit which measures the distance, when receiving a predetermined signal from the remote controller.
3. (Original) The display device according to claim 1, wherein the control unit comprises a distance deciding unit which decides whether the distance exceeds a specified value, when receiving a predetermined signal from the remote controller.

4. (Cancelled).

5. (Currently amended) The display device according to claim 1, wherein the
~~control unit magnifies a whole image displayed by the display unit attribute information~~
indicates an entirety of the image as the predetermined information.

6. (Currently amended) The display device according to claim 1, wherein the
~~control unit magnifies character information included in the image displayed by the~~
~~display unit attribute information indicates character information included in the image~~
as the predetermined information.

7. (Currently amended) The display device according to claim 1, wherein the
~~control unit magnifies subtitle information included in the image displayed by the display~~
~~unit attribute information indicates subtitle information of the image as the~~
predetermined information.

8. (Currently amended) The display device according to claim 1, wherein the
~~control unit magnifies an operation icon included in the image displayed by the display~~
~~unit attribute information indicates an operation icon included in the image as the~~
predetermined information.

9. (Cancelled).

10. (Currently amended) The display device according to claim 1, wherein the control unit [[resets]] stops a magnifying process according to an external instruction to reset a size of the predetermined information.

11. (Currently amended) The display device according to claim 1, wherein the control unit [[resets]] stops a magnifying process to reset a size of the predetermined information, when the display unit is operated by an operating means other than the remote controller.

12. (Currently amended) A method of magnifying and displaying, comprising:
displaying an image on a display unit;
accessing a management table which stores display attribute information
indicating predetermined information of the image in response to a command from a
remote controller; and

magnifying [[a]] the predetermined information included in a displayed image,
according to the attribute information and a distance between the displaying unit and a
person who watches the image the remote controller.

13-16. (Cancelled)

17. (New) The display device according to claim 5, wherein the display unit displays a portion of the image on an entirety of a display screen and the control unit reduces the size of the portion.

18. (New) The method according to claim 12, further comprising:
measuring the distance when a predetermined signal is received from the remote controller.

19. (New) The method according to claim 12, further comprising:
determining whether the distance exceeds a specified value when a predetermined signal is received from the remote controller.

20. (New) The method according to claim 12, further comprising:
magnifying the predetermined information according to control information attached to the image.

21. (New) The method according to claim 12, wherein the attribute information indicates an entirety of the image as the predetermined information.

22. (New) The method according to claim 12, wherein the attribute information indicates character information included in the image as the predetermined information.

23. (New) The method according to claim 12, wherein the attribute information indicates subtitle information of the image as the predetermined information.

24. (New) The method according to claim 12, wherein the attribute information indicates an operation icon included in the image as the predetermined information.

25. (New) The method according to claim 12, further comprising:
managing video contents together with the display attribute information; and
magnifying the predetermined information included in the video contents
according to the display attribute information.

26. (New) The method according to claim 12, further comprising:
resetting a size of the predetermined information by stopping a magnifying process.

27. (New) The method according to claim 12, further comprising:
resetting a size of the predetermined information by stopping a magnifying process when the display unit is operated by an operating means other than the remote controller.

28. (New) The method according to claim 21, further comprising:
displaying a portion of the image on an entirety of a display screen; and
reducing the size of the portion.
